WEC et. al.

More PM nicotine -- smaller pop.
- more likely to smoke
fewer cigarettes more
completely

Normally [illegible] (2.3) [illegible] of [illegible] (RJR 4X)

our data under some part
of BIW chart

.5mm ring

BIW admitted cd go down to 60% -
we added 30% line. (larger bracket)

Fig C - started at nonsensical point; need
origin.
Fig D - irrelevant

Cotinine - not linear dose response

SD, not Standard error

would have to use control (injections)

* because smoke absorbs rounded FTC delivery.

- not carried out of higher tar
- none of our results show BIW tar-to-nicotine
ratio
